

Downloading and Installing Command Workstation

- Access the FIERY web interface by using the IP Address
- Click on Client Software Installer
- Enter fiery IP Address under server url
- Select Command Workstation application and install
- Reboot pc after successful install
- Start Command Workstation
- Program should automatically detect the Fiery IP address if not just enter the IP manually.
- Select user is administrator
- Enter the password Fiery.1
- You should be on Command Workstation and be able to print.
