

## FTP Server App Setup

Create "Scans" Folder in Desktop

Download FTP Server App from Apple Store

Configure FTP Server

Server Root: Folder Destination

Port: 21

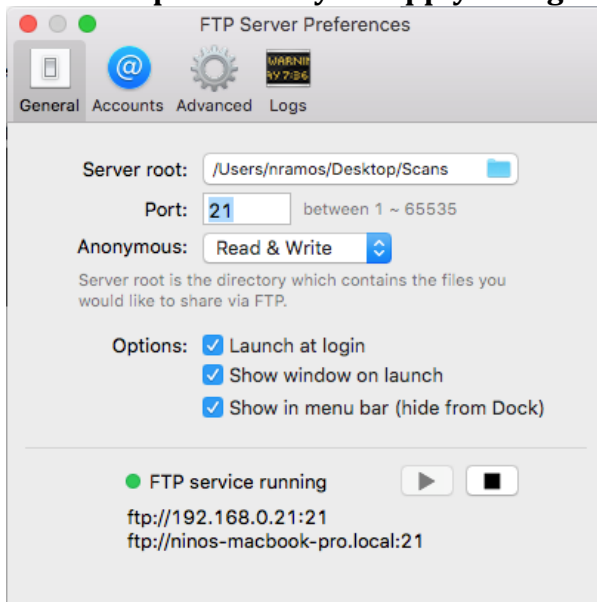

Anonymous: Read & Write

Launch at login

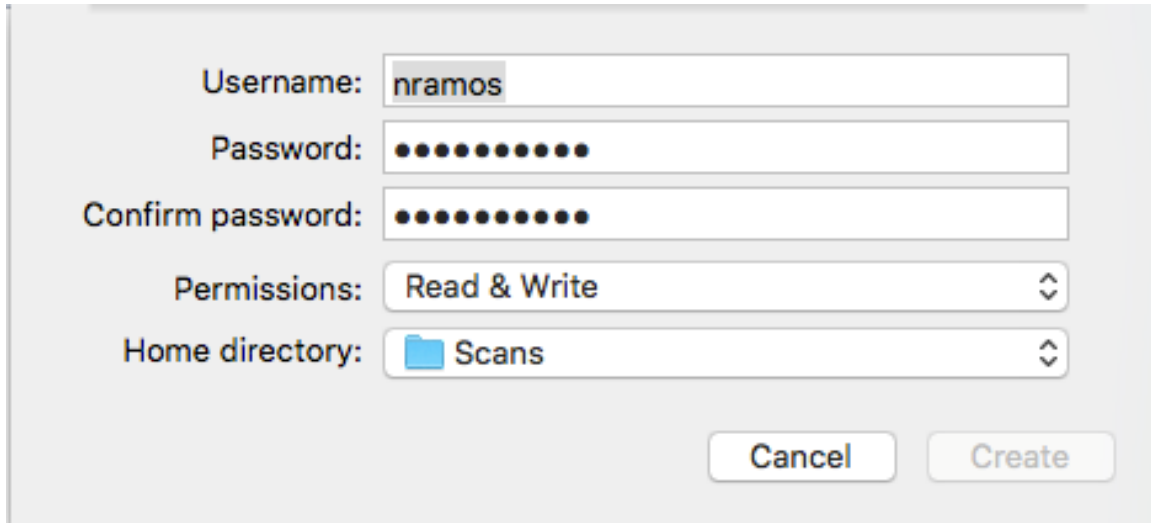

Show window on launch

Show in menu bar (hide from dock)

**Press "Stop" and "Play" to apply changes**

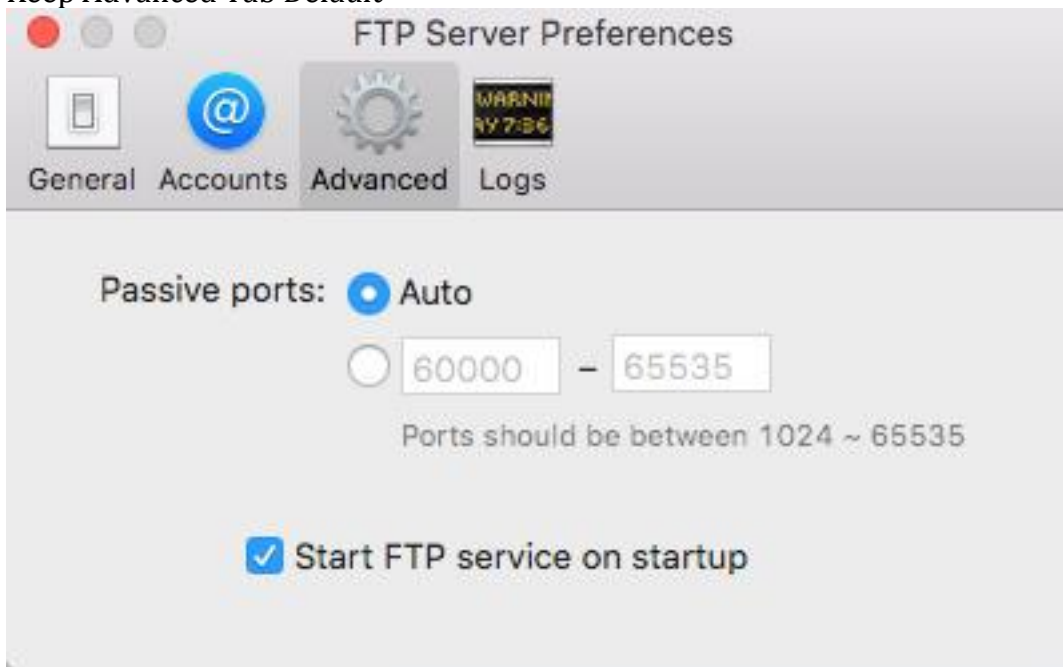

Click on "Accounts" Tab  
Add Mac User Account

A dialog box for creating a new Mac user account. It contains the following fields and controls:

- Username:** A text field containing the text "nramos".
- Password:** A password field with 10 black dots.
- Confirm password:** A password field with 10 black dots.
- Permissions:** A dropdown menu currently showing "Read & Write".
- Home directory:** A dropdown menu currently showing a folder icon and the text "Scans".
- Buttons:** "Cancel" and "Create" buttons are located at the bottom right.

Keep Advanced Tab Default

The "Advanced" tab of the "FTP Server Preferences" window. The window title is "FTP Server Preferences" and it has four tabs: "General", "Accounts", "Advanced", and "Logs". The "Advanced" tab is selected and highlighted with a gear icon. The settings are as follows:

- Passive ports:** A radio button labeled "Auto" is selected. Below it, there is a radio button and a range of ports "60000 - 65535".
- Ports should be between 1024 ~ 65535** (text below the port range).
- Start FTP service on startup:** A checked checkbox.

Press "Stop" and "Play" to apply changes

Access the Ricoh Web Image Monitor and login as admin, then Address Book  
Key in Name & Key Display  
Folder Authentication, Mac OS user & password login
