

Access the Printer's Interface, then "Security"

The screenshot shows a web browser window with the address bar displaying `192.168.116.220/#/Settings/Security`. The page header includes the Lexmark logo, "Embedded Web Server", and user information: "Language", "Guest", and "Log In". Below the header, the printer model "Lexmark XC6152" is listed along with its IP address (192.168.116.220), contact name, and location. A printer icon is visible on the right. The main content area shows the "Status: Ready" and a search bar. A left sidebar contains a "Select Option" menu with "Security" highlighted. The main panel displays the "Security" settings, including "Login Methods" (Public) and "Local Accounts" (Add User button). "User Name Accounts" are listed below, showing 1 account and options to change browser and control panel login methods.

Under Local Account – Click on "Add User" then "PIN"

This close-up screenshot focuses on the "Local Accounts" section of the Security settings. The "Add User" button is highlighted with a yellow box. A dropdown menu is open, showing the following options: "User Name/Password", "User Name", "Password", and "PIN". The "PIN" option is also highlighted with a yellow box. The background shows the "Local Accounts" header and the "Add User" button.

Input Name, Enter Pin, & Confirm PIN. Put a check mark on Admin then "Save"
